- 3 Advent Sunday.  
10 i Sun. in Advent.  
17 ii " "  
21 St. Thomas.  
24 iii Sun. in Advent  
25 Christmas.  
26 St. Stephen.  
27 St. John Evangelist  
28 Holy Innocents.

## Eclipses 1911

There will be two eclipses in 1911, both of the Sun, as follows:

I. Total of the Sun April 28th, visible as a small partial eclipse on the Sun's Southern limb. The Sun will set more or less eclipsed East of a line from near Pittsburg, Pa. to near Matagorda Bay, Texas. Washington, D. C. is nearly on the Northern Atlantic boundary. Invisibly North of a line from Portland, Oregon, through Milwaukee to Pittsburg. At Chicago there will be little more than a mere contact of limbs just before sunset. At St. Louis the greatest eclipse will be about three digits, ending just before sunset. At New Orleans about three digits will be eclipsed at sunset.

II. Annular of the Sun October 22d, invisible in America.

### CHRONOLOGICAL CYCLES.

Dominical Letter... A	Roman Indication. 9
Epact..... 30	Julian Period..... 6624
Golden Number.... 12	Dionysian Period.. 240
Solar Cycle..... 16	Jewish Lunar Cycle 9
Mohammedan Era, Year 1329 begins January 2d.	
Jewish Era, Year 5672 begins Sept. 22d, Sunset.

## Foretelling the Weather

### A RISING BAROMETER.

A rapid rise indicates unsettled weather.

A gradual rise indicates settled weather.

A rise with dry air and cold increasing in summer indicates wind from the northward; and if rain has fallen, better weather may be expected.

A rise with moist air and a low temperature indicates wind and rain from the northward.

A rise with southerly winds indicates fine weather.

### A STEADY BAROMETER.

With dry air and seasonable temperature indicates a continuance of very fine weather.

### A FALLING BAROMETER.

A rapid fall indicates stormy weather.

A rapid fall with westerly wind indicates stormy weather from the northward.

A fall with a northerly wind indicates storm, with rain and hail in summer, and snow in winter.

A fall with increased moisture in the air, and heat increasing, indicates wind and rain from the southward.

A fall with dry air and cold increasing in winter indicates snow.

A fall after very calm and warm weather indicates rain with squally weather.

## Combinations of Colors

Red and Black makes Brown.

Red with Light Blue makes Purple.

Lake with White makes Rose.

Umber and White makes Drab.

White and Brown makes Chestnut.

Carmine with White makes Pink.

Lamp Black with White makes Lead.

Paris Green with White makes Bright Green.

Yellow Ochre and White makes Buff.

White tinted with Purple makes French White.

White tinted with Black and Purple makes French Gray.

Emerald Green with White makes Brilliant Green.

Chrome Green with White makes Pea Green.

Chrome Yellow with White Lead makes Straw.

White with tints of Black and Purple makes Ashes of Roses.

White tinted with Red and Yellow makes Cream.

Blue with Lead Color makes Pearl.

Lamp Black and Indigo makes Silver Gray.

Chrome Yellow, Black, Red and Blue makes Olive.

Chrome Green and Black makes Dark Green.

Yellow and Brown makes Chocolate.

Vermilion and Chrome Yellow makes Orange.

Carmine and Straw makes Flesh.

Blue with Yellow makes Green.

Bolivia .....	472,000	2,500,000	La Paz.
Norway .....	125,590	2,000,977	Christiania.

## Poisons and Antidotes

Send for a physician. Induce vomiting, by tickling throat with feather or finger. Drink hot water or strong mustard and water. Swallow sweet oil or whites of eggs. *Acids are antidotes for alkalis, and vice versa.*

**ACIDS, Mineral.**—Chalk, magnesia (plaster off wall in emergency), solution carbonate of soda, emollient drinks, fixed oils. *Carbolic.*—Any soluble sulphate, such as magnesia. *Hydrocyanic.*—Fresh air and artificial respiration, with cold effusion. Ammonia by inhalation and intravenously in vein of leg.

**ACONITE.**—Emetics, stimulants, external and internal; keep up external heat, keep flat on back.

**ANTIMONY TART.**—Vegetable acids, such as tannic acid, catechu.

**ARSENIC.**—Freshly precipitated hydrated sesquioxide of iron made by adding magnesia to any iron solution.

**BELLADONNA.**—Emetics—mustard flour in water; give physostigma or pilocarpine; cold to head.

**CHLORINE WATER.**—Albumen, white of egg, milk, flour.

**CHLOROFORM.**—Fresh air, artificial respiration (inclining head down, pull tongue forward), brandy and ammonia intravenously in leg, the HYPODERMIC injection of 15 m. tincture of digitalis and 1-60 of a grain of atropine.

**COLCHICUM.**—Emetics, followed by demulcent drinks. If coma be present, brandy, ammonia, coffee. Opium in large dose. Keep up external heat.

**CONIUM.**—Emetics, followed by stimulants external and internal.

## Poisons and Antidotes

**CORROSIVE SUBLIMATE.**—Albumen, white of egg (4 gr. sublimate require white of one egg), flour, milk. Equal parts of lime water and milk. Emetics, or evacuate stomach by pump.

**COPPER SULPH.**—Yellow prussiate of potash or soap.

**CROTON OIL.**—Emetics; wash out stomach, followed by mucilaginous fluids containing opium.

**DIGITALIS.**—Recumbent posture after emetics. Emetics and opium; give tincture aconite.

**IODINE.**—Emetics and demulcent drinks, starch or flour diffused in water, opium and external heat.

**LEAD SALTS.**—Any soluble sulphate, either magnesia or soda, succeeded by emetics, and afterwards by opium and milk.

**LOBELIA.**—Stimulants externally and internally; external heat.

**MORPHINE.**—Same as opium.

**OPIUM.**—Atropine hypodermically till respirations number 8 per minute. Stomach pump, stimulants, external and internal, brandy and coffee, cold affusion, ammonia to nostrils, galvanic shocks, compelling to move about, artificial respiration, electric brush. Permanganate of potash.

**OXALIC ACID.**—Lime, not potash or soda.

**PHOSPHORUS.**—Sulphate of copper in emetic dose as chemical antidote. No oils. Emetics and purgatives.

**POTASH AND SODA SALTS.**—Dilute acetic acid, citric acid, lemon juice, fixed oils, demulcents, vinegar.

**SILVER NITRATE.**—Solution of common salt and demulcent drinks. Emetics.

## Help in Case of Accidents

**DROWNING.**—1. Loosen clothing, if any. 2. Empty lungs of water by laying body on its stomach, and lifting it by the middle so that the head hangs down. Jerk the body a few times. 3. Pull tongue forward, using handkerchief, or pin with string, if necessary. 4. Imitate motion of respiration by alternately compressing and expanding the lower ribs about twenty times a minute. Alternately raising and lowering the arms from the sides up above the head will stimulate the action of the lungs. Let it be done gently but persistently. 5. Apply warmth and friction to extremities. 6. By holding tongue forward, closing the nostrils, and pressing the "Adam's apple" back (so as to close entrance to stomach), direct inflation may be tried. Take a deep breath and breathe it forcibly into the mouth of patient, compress the chest to expel the air, and repeat the operation. 7. DON'T GIVE UP! People have been saved after HOURS of patient, vigorous effort. 8. When breathing begins, get patient into a warm bed, give WARM drinks, or spirits in teaspoonfuls, fresh air, and quiet.

**BURNS AND SCALDS.**—Cover with cooking soda and lay wet cloths over it. Whites of eggs and olive oil. Olive oil or linseed oil, plain, or mixed with chalk or whiting. Sweet or olive oil and lime-water. Shock, which is always present in severe burns, requires the administration of stimulants. Pain is more constant and intense in burns than in any other form of injury, and requires sedatives.

**FIRE IN A BUILDING.**—Crawl on the floor. The clearest air is the lowest in the room. Cover head with woolen wrap, wet if possible.

## Help in Case of Accidents

**SUFFOCATION FROM INHALING ILLUMINATING GAS.**—Get into the fresh air as soon as possible and lie down. Keep warm. Take ammonia—twenty drops to a tumbler of water, at frequent intervals; also, two to four drops tincture of nux vomica every hour or two for five or six hours.

**HÆMORRHAGE.**—The usual treatment is rest in the recumbent position; small pieces of ice should be freely swallowed, and the application of ice wrapped in a towel or in an ice-bag, or snow, cold water, etc., over the stomach; hot applications may be applied to the extremities.

**MAD DOG OR SNAKE-BITE.**—Tie cord tight above wound. Suck the wound and cauterize with caustic or white-hot iron at once, or cut out adjoining parts with a sharp knife. Give stimulants, as whisky, brandy, etc.

**FIRE IN ONE'S CLOTHING.**—*Don't run*—especially not downstairs or out-of-doors. Roll on carpet, or wrap in woolen rug or blanket. Keep the head down, so as not to inhale flame.

**FIRE FROM KEROSENE.**—*Don't use water*, it will spread the flames. Dirt, sand, or flour is the best extinguisher, or smother with woolen rug, table-cloth, or carpet.

**CINDERS IN THE EYE.**—Roll soft paper up like a lamp-lighter, and wet the tip to remove, or use a medicine dropper to draw it out. Rub the *other eye*.

**FAINTING.**—Place flat on back; allow fresh air, and sprinkle with water. Place head lower than rest of body.

**STINGS OF VENOMOUS INSECTS, ETC.**—Apply weak ammonia, oil, salt water, or iodine.

**LIGHTNING.**—Dash cold water over a person

## Weights and Measures

**MEASURES OF WEIGHT.**—*Avoirdupois*: 1 pound equals 7000 grains: 16 grains, 1 ounce; 16 ounces, 1 pound; 112 pounds, 1 hundredweight; 20 hundredweight, 1 ton. *Troy*: 1 pound equals 5760 grains; 24 grains, 1 pennyweight; 20 pennyweights, 1 ounce; 12 ounces, 1 pound. *Apothecaries*: 1 pound equals 5760 grains; 20 grains, 1 scruple; 3 scruples, 1 dram; 8 drams, 1 ounce; 12 ounces, 1 pound.

**MEASURES OF LENGTH.** *Customary*: 12 inches equal 1 foot; 16½ feet, 1 rod; 40 rods, 1 furlong; 8 furlongs, 1 statute mile; 1 statute mile, 5280 feet or 1760 yards; 1 marine league, 3 nautical miles; 1 fathom, 6 feet; 1 nautical mile equals 6080.2 feet.

**SURFACE OR SQUARE MEASURE.**—*Customary*: 144 square inches equal 1 square foot; 9 square feet, 1 square yard; 30.25 square yards, 1 square rod; 40 square rods, 1 square rood; 4 square roods, 1 acre; 640 acres, 1 square mile; 1 acre equals 208.7 feet square.

**SOLID OR CUBIC MEASURE.**—*Customary*: 1728 cubic inches equal 1 cubic foot; 27 cubic feet, 1 cubic yard; 40 cubic feet of round timber, 1 ton; 50 cubic feet of hewn timber, 1 ton; 128 cubic feet of wood (4 feet by 4 feet by 8 feet), 1 cord; 24.75 cubic feet of stone, 1 perch—usually 16½ feet by 1½ feet by 1 foot, but varies greatly.

**LIQUID MEASURE.**—English gallon equals 277.274 cubic inches, or 1.20032 U. S. gallons; 4 gills, 1 pint; 2 pints, 1 quart; 4 quarts, 1 gallon.

**DRY MEASURE.**—1 bushel equals 2750.42 cubic inches; 2 pints, 1 quart; 4 quarts, 1 gallon; 2 gallons, 1 peck; 4 pecks, 1 bushel.

## To Tell Time of Tide

The time of high water at the places following may be found approximately for each day by adding or subtracting from the time of high water at New-York the hours and minutes annexed.

## The Metric System

**METRIC WEIGHTS.**—10 milligrams make 1 centigram, 10 centigrams 1 decigram, 10 decigrams 1 gram, 10 grams 1 dekagram, 10 dekagrams 1 hektogram, 10 hektograms 1 kilogram, 1000 kilograms 1 metric ton.

**METRIC MEASURES.**—(One milliliter equals cubic centimeter.) 10 milliliters make 1 centiliter, 10 centiliters 1 deciliter, 10 deciliters 1 liter, 10 liters 1 dekaliter, 10 dekaliters 1 hektoliter, 10 hektoliters 1 kiloliter.

**METRIC LENGTHS.**—10 millimeters make 1 centimeter, 10 centimeters 1 decimeter, 10 decimeters 1 meter, 10 meters 1 dekameter, 10 dekameters 1 hektometer, 10 hektometers 1 kilometer, 1 acre equals .4047 hectare; 1 bushel, 35.24 liters; 1 centimeter, .3937 inch; 1 cubic centimeter, .0610 cubic inch; 1 cubic foot, .0283 cubic meter; 1 cubic inch, 16.39 cubic cent.; 1 cubic meter, 35.31 cubic feet; 1 cubic meter, 1.308 cubic yards; 1 cubic yard, .7645 cubic meter; 1 foot, 30.48 centimeters; 1 gallon, 3.785 liters; 1 grain, .0648 gram; 1 gram, 15.43 grains; 1 hectare, 2.471 acres; 1 inch, 25.40 millimeters; 1 kilogram, 2.2046 pounds; 1 kilometer, .6214 mile; 1 liter, .008 quart (dry); 1 liter, 1.057 quart (liquid); 1 meter, 3.281 feet; 1 mile, 1.609 kilometers; 1 millimeter, .0394 inch; 1 ounce (avd.), 28.35 grams; 1 ounce (Troy), 31.10 grams; 1 peck, 8.809 liters; 1 pint, .4732 liter; 1 pound, .4536 kilogram; 1 quart (dry), 1.103 liters; 1 quart (liquid), .9464 liter; 1 sq. centimeter, .1550 sq. inch; 1 sq. foot, .0929 sq. meter; 1 sq. inch, 6.452 sq. cent.; 1 sq. meter, 1.196 sq. yards; 1 sq. meter, 10.76 sq. feet; 1 sq. yard, 8361 sq. meter; 1 ton (2000 lbs.), .9072 metric ton; 1 ton (2240 lbs.), 1.017 metric ton; 1 ton (metric), 1.102 tons (2000 lbs.); 1 yard, .9144 meter.

## Business Law

Ignorance of the law excuses no one.

Money receipt not always conclusive.

The acts of one partner bind all the rest.

A contract made with a minor is void in law.

The law compels no one to do impossibilities.

Notes bear interest only when so stated on them.

Signatures made with a lead pencil are good in law.

Contracts that are made on Sunday cannot be enforced.

Principals can be held responsible for the acts of their agents.

No consideration is sufficient in law if it be illegal in its nature.

If the time of payment of a note is not inserted it is held payable on demand.

A note obtained by fraud, or from an intoxicated person, cannot be collected.

Each individual in a partnership is responsible for the whole amount of the debts of the firm, except in cases of special partnership.

If a note is lost or stolen it does not release the maker; if the consideration for which it was given and the amount can be proven, he must pay it.

"Value received" is usually written in a note, and it should be, but is not necessary. If it is not written it is presumed by the law, or may be supplied by proof.

## Weekly Table of Wages

Week	1 hour	2 hours	3 hours	4 hours	5 hours	6 hours	1 day	2 days	3 days	4 days	5 days	6 days
\$1.00	3	6	9	12	15	18	25	50	75	1.00	1.25	1.50

## Rules for Com- puting Interest

The following will be found to be excellent rules for finding the interest on any principal for any number of days. When the principal contains cents, point off four places from the right of the result to express the interest in dollars and cents. When the principal contains dollars only, point off two places.

Four per Cent.—Multiply the principal by number of days to run, and divide by 90.

Five per Cent.—Multiply by number of days, and divide by 72.

Six per Cent.—Multiply by number of days, and divide by 60.

Seven per Cent.—Multiply by number of days, and divide by 52.

Eight per Cent.—Multiply by number of days, and divide by 45.

Nine per Cent.—Multiply by number of days, and divide by 40.

Ten per Cent.—Multiply by number of days, and divide by 36.

Twelve per Cent.—Multiply by number of days, and divide by 30.

Fifteen per Cent.—Multiply by number of days, and divide by 24.

Eighteen per Cent.—Multiply by number of days, and divide by 20.

Twenty per Cent.—Multiply by number of days, and divide by 18.

Twenty-four per Cent.—Multiply by number of days, and divide by 15.

Was playing Sniff with Mother most of the evening.

Wea. THUR. SEPT. 21, 1911 Ther.

Clear.

At Home and at Princeton  
Dad and I left at  
8:45 this morning. I  
left him at Phila. and  
arrived at Princeton  
at 11:45 this morning.  
Gallbraith went around  
with me to get my  
freshman clothes;  
Black jersey, corduroy  
trousers Black gaiters  
etc. Then we went to  
commons for lunch. At  
3 P.M. went to chapel.  
Ted Paul rescued us from  
Soph's after chapel.

Was bothered by people  
trying to sell me stuff.  
John Hartman took me around.

Wea. FRI. SEPT. 22, 1911 Ther.

Cloudy.

At Princeton  
Went to Chapel this  
morning. Tried to  
get my schedule.  
But too much of a mob.  
Went to my first  
recitation. Did not  
get "hosed" very much  
this morning.

This afternoon at about  
2 o'clock was the election  
rush. Law Bill Waterman.  
It was fierce fight.

This evening at 8 o'clock  
was the Common Rush.  
Not so bad a fight as  
this afternoon.

Wrote a letter to Mother  
to-day
